

How to Stop Overthinking When Making Decisions

6 Weird Not So Secret
Tips That May Work or Help

by

Candice Cizut - Author, **The Silent
Code: Escape The Hidden System That Runs
Your Life**

About Me and Why I Wrote This Guide

First, I want to say **thank you**, seriously.

You showed **decisiveness** by downloading this free guide and actually starting it. Most people scroll, hesitate, and stay stuck. You didn't. That already tells me something powerful about you. You've got momentum, and I respect that

This little free ebook is my way of saying **thank you** for taking action. It's my gift to you, and **I ask for just one thing in return**: if it resonates, pay it forward. Share it, talk about it, or grab one of my full ebooks that speaks to you.

I'm **Candice**. I love *tattoos*, and I call myself a *jack of all trades*. I **never waited for permission** to explore life. I've built results across business, internet marketing, affiliate campaigns, publishing, coaching, crypto, and creativity. I've worked with people who were broke, brilliant, famous, lost, and everything in between, and I helped some, failed some and learned something from all of them.

But I didn't start here.

I had to fight through the same voice that might be whispering in your head right now .

"You're not good enough."

I've heard it all:

"You're too shy."

"That's a man's game."

“You’ve got too many tattoos. No one will take you seriously.”

“What do you know about tech?”

“It’s too late.”

“It’s too expensive.”

Those voices lied. I’ve made terrible decisions too. I’ve lost opportunities. I missed a business that went 85X because I hesitated. I once paid **\$1,497** for an ebook/course that turned out to be pure fluff. The funny part? My five most popular ebooks combined cost less than **\$100** and deliver more real value than that “premium” garbage ever did.

But I never let those mistakes define me. I treated every bad decision like training. Every loss was tuition for the next level. That’s what this guide is really about, turning hesitation into horsepower.

These six weird tricks aren’t “theories.” They’re what I personally used in moments when I was paralyzed, panicking, or overthinking myself into inaction. They’re fast, they may work, and they retrain your brain to ***move forward under pressure.***

If you felt a spark reading this. If something clicked, then I’d love to invite you to go deeper. **At the end of this book, I’ve added links to my other works, tools, and communities.** Pick what resonates most. Not all will, and that’s okay. *Just one might completely shift your trajectory.*

You’ve already proven you can take a small decisive action. Keep that energy alive. Check out what’s next. It’s about you staying consistent with the decision you’ve already made: ***to grow, act, and win.***

Why This Small Guide Matters

Overthinking is a silent killer.

It ruins confidence, drains energy, kills opportunities, and makes people stop respecting you, and may even make you sick.

Every time you hesitate, you teach your brain that *you can't trust yourself*.

That's how indecision turns into weakness, financially, emotionally, energetically, and socially.

This short guide gives you six weird, psychological tricks to destroy that loop and start moving again.

Because you deserve clarity, freedom, money, love, growth and happiness.

SECRET 1: ENEMY MODE

How to Do It: When facing a tough decision, imagine the person or situation forcing it as an *enemy* trying to use it to destroy you, even if it sounds absurd. Then check your gut: if you feel calm, laugh, or clear, you're safe. If you feel tight or panicked, step back.

How It Helps: It flips you out of “people-pleaser” mode and activates your survival intelligence; the part of your brain that spots manipulation fast.

Short-Term Benefit: Instant gut clarity.

Long-Term Benefit: You stop making weak, approval-seeking decisions.

Example: Your friend pressures you to invest in something “guaranteed.” Imagine they're a rival trying to trick you. Suddenly your mind starts spotting every red flag you ignored. That's enemy mode working.

SECRET 2: THE REVERSIBILITY TEST

How to Do It: Ask one question: *“If this goes wrong, can I reverse it?”* If yes — move fast. If no — slow down and calculate.

How It Helps: It removes emotional fog and replaces it with binary logic. Most overthinking comes from treating small choices like life-or-death ones.

Short-Term Benefit: Stops paralysis instantly.

Long-Term Benefit: Builds calm logic under pressure.

Example: Quitting a job is reversible (you can find another). Destroying a partnership isn't. Simple awareness kills unnecessary anxiety.

SECRET 3:

10-SECOND PROFIT COUNTDOWN

How to Do It: Start a 10-second countdown. From 10 to 0, quickly estimate what this decision could *profit you*, financially, emotionally, or energetically. Even if it's a wild guess, do it fast.

How It Helps: It moves you from emotion to logic by forcing mental math under time pressure. That alone can override panic.

Short-Term Benefit: Forces immediate clarity.

Long-Term Benefit: Trains logical dominance under emotion.

Example: You're invited to a new project. You count down: "10... will it grow my network? 9... any real skill gain? 8... time cost?" By zero, you already know your answer.

SECRET 4: THE ROLE REVERSAL

How to Do It: Repeat exactly what's being asked of you, word for word to the requestor. Or imagine you're the other person. What would you want *from you*? Or role play with a friend.

How It Helps: Reversing roles pulls emotion out and exposes hidden agendas or weak framing. You stop being reactive and start seeing the full chessboard.

Short-Term Benefit: Neutralizes manipulation.

Long-Term Benefit: Builds social intelligence and boundaries.

Example: Someone says, "Join my group, it'll be huge for exposure." You reply, "So you want me to bring my followers and credibility to your group in exchange for exposure?" That flips power instantly.

SECRET 5: THE SLEEP LOOP

How to Do It: Before sleeping, repeat the decision and its key details silently, over and over until you drift off.

How It Helps: Your subconscious keeps processing while you sleep, free of fear and noise. When you wake up, your answer will often be waiting, calm and obvious.

Short-Term Benefit: Reduces decision fatigue overnight.

Long-Term Benefit: Builds intuitive trust and mental recovery cycles.

Example: You're unsure whether to move cities. You repeat before sleep: "Stay or go, what's true for me?" You wake up feeling pulled strongly toward one choice; that's your clarity talking.

SECRET 6: THE DECISION OUTSOURCE

How to Do It: Call someone who has results in the area you're deciding about. Ask their opinion, but more importantly, *watch how they think*.

How It Helps: You borrow another person's successful decision-making pattern until it becomes your own. It short-circuits analysis paralysis.

Short-Term Benefit: Instant clarity through expert lens.

Long-Term Benefit: You absorb higher-level reasoning by exposure.

Example: You're stuck between launching now or waiting. You call a mentor who's built something real. They break it down in 30 seconds, and you instantly see what matters.

FINAL WORD

Every confident person you admire isn't genius level smarter, they just decide faster.

The mind respects movement
Overthinking is self-sabotage disguised as safety.

Start using one of these six weird tricks today, and hopefully you'll feel your confidence, respect, and opportunities rise immediately.

If this short guide hits hard, you're ready for the full reboot. Or if you are just curious to explore more. I'd love to invite you to go deeper.
